This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

By resolution: Resident ministers in the city of Columbus have, by a resolution of the General Assembly, free use of the Library, in accordance with the rules, who are at the time pastors of congregations, and who apply in person for books for their own special use.

The privilege of drawing books from the Library is also extended to the officers and teachers in the benevolent institutions of the State; officers and teachers of the Ohio Agricultural College; officers of the Ohio Penitentiary; ex-officers of the State; ex-officers of the General Assembly, and to the widows of deceased ex-members of the General Assembly and ex-State officers.

Books must be returned within two weeks.

Books of reference, and other books of peculiar value, are kept from circulation.

No public officer, or other person privileged to draw books, has the right to extend the privilege to others, without forfeiting his own.

Books lost or damaged must be replaced or paid for.

Copying from Library books must be done with pencil.

EXPLANATIONS.

The Ohio State Library registers 49,000 volumes. The catalogues that have been published were by Zechariah Mills, in 1823, 1826, and 1840; by Thomas Kennedy, in 1842; by John Greiner, in 1845, 1848, and 1849; and by William Holden, in 1875

The plan of this catalogue is simple; each work is entered under author, title and subject, the whole being arranged in a single alphabetical series. Any work can readily be found by referring to the author, title, or subject.

The case and shelf-marks are given on the right-hand margin of the page. The first column of figures denotes the *case*, the second column, the *shelf*.

The prefix *M'*, *Mc*, or *Mac*, is treated as a part of the word, as if spelled *Mac*.
